

## **MINI REPORT (area 1) 10.08-10.14**

### **What was done this week?**

We had a team meeting, started playing around with Python and XML file reading. Everyone is deepening their knowledge in Python. During the team meeting we tried to understand the provided XML file.

### **What issues/risks/blockers do you have?**

Communication with other teams and lack of Python skills. Ill team members.

### **What is the goal for next week?**

To read any XML file and convert it to JSON file format.

### **What is the overall status - green, yellow, or red? Explain briefly in case of non-green status.**

Right now, the overall status of our team project's flow is between yellow and green. The thing that is keeping us from the green status is that we are out of our schedule. If next week's goal will be done, the overall status will be green.
