

Area 3 Mini-Report

November 25, 2022

What was done this week?

- Tried to use basic JSON reading methods, managed to write some example data to a testing JSON file.

What issues/risks/blockers do you have?

- Weak activity of the team.
- Coming up with the solution on how to efficiently read necessary JSON file.

What is the goal for the next week?

- Update requirements specification;
- Update technical specification;
- Write additional tests.
- Try out Unit tests.
- Create a new object in our JSON file that will hold solar panel coordinates.

Current status - **Redish**
