

# Area 3 Mini-Report

December 9, 2022

### **What was done this week?**

- Visualized the suitable area of the roof for mounting solar panels in 3D model.
- Updated Requirements specification.
- Adjusted gap length according to our roof coordinates.

### **What issues/risks/blockers do you have?**

- Looping through our coordinates and modifying them accordingly to receive correctly modified data was an issue.

### **What is the goal for the next week?**

- Update technical specification.
- Do UNIT tests.

Current status - **Redish**
