

MINI REPORT (area 1) 10.28

What was done this week?

We started to write Technical Specification.

Added security features to our code.

Communicated with area 5 about adding our area's features to the final product.

Working on solution to make the API to read a TXT file which is written in XML format.

What issues/risks/blockers do you have?

The biggest issue is that our team members are ill. Three team members were absent last week. Also, we did not have so much time to finish our task, what was planned for this week from Requirements specifications.

What is the goal for next week?

Finish security options of input and add some basics roof's parameters to JSON.

Finish Technical Specification.

What is the overall status - green, yellow, or red? Explain briefly in case of non-green status.

Right now, the overall status of our team project's flow is yellow/redish.
