MINI REPORT (area 1) 11-04

What was done this week?
We finished writing the Technical specification.

Decided to make a package instead of API.

Updated Requirements specification.

Our package, finally, can extract info which is needed for other teams.

Our package now reads any XML formatted file. (For example, *.docx, *.pptx, *.txt, etc.)

Started to implement security features.

What issues/risks/blockers do you have?

Right now, we could have issues with implementing security features to our package.

What is the goal for next week?

The main goal for next week is to improve extracting info to JSON. Also, we will try to implement security features.

What is the overall status - green, yellow, or red? Explain briefly in case of non-green status.
Right now, the overall status of our team project's flow is greenish.
